

EMPOWERING SOLUTIONS

MS100 Pen Scanners

The Unitech MS100

bar code wand is targeted toward low reading volume and cost effective solutions. The advanced optics and electronic design convert bar code labels into a high quality digital signal. Able to read color, faded, and low contrast bar code labels quickly and accurately, the MS100 is a proven solution.

Ergonomic

Its shape gives the MS100 the comfort and handling of a conventional ink pen. Just sweep the tip of the wand across the bar code in either direction and listen for the "good read" beep that lets you know the data has been successfully captured. It doesn't get easier than that!
